

# 東北アジア 研究談話会

vol.

115

東北アジア研究センターでは、スタッフ同士の研究交流と相互理解を深めるため、毎月研究報告会(東北アジア研究談話会)を開催しています。今月は下記の日程・内容で行います。センター外の方でも、興味があるようでしたら是非ご参加ください。

日時

2025年 3月 31日 月

13:00~14:00

【会場】東北アジア研究センター4階大会議室

(川内合同研究棟436号室)

※会場のみでの開催です。オンライン同時配信は行いません。

## 報告 ①

● 使用言語：英語

### “Environmental challenges and risks for Siberian indigenous peoples 17th-20th centuries”

First, we will address the documentary question by showing both its richness in terms of volume and diversity to study Siberian indigenous societies in the ‘longue durée’, in accordance with the approach of the French Annales School.

We will then focus on the methods of the ‘discovery’ of Siberian communities by Westerners and Slavs by putting into perspective the strategic and economic issues at the origin of colonization and its consequences for the indigenous people.

Finally, the presentation will attempt to show what were the multiple complementary strategies developed by these peoples to adapt to a hostile and changing natural environment caused by an emerging anthropocene.

The COVID-19 pandemic has disproportionately impacted minority populations worldwide, yet research on the experiences of migrants in Japan remains limited. This presentation aims to explore the challenges migrants faced during the crisis and their effects on well-being. By analyzing open-ended responses from a questionnaire survey conducted in October 2021, I first identify the most commonly reported difficulties and compare them to those experienced by Japanese nationals. Additionally, through regression analysis, I examine which difficulties reduce migrants’ willingness to continue living in Japan and investigate the socio-environmental factors that may help mitigate these challenges.
